APPLE IOS MOBILE SETUP

iPhone, iPad, iPod Touch

Use Outlook for iOS

**NOTE** Outlook for iOS requires iOS 8.0 or higher. If the app is incompatible with your device, try adding your mail account using the built-in mail app that comes with your device.

View these steps in a video.
1. Download the [Outlook for iOS](https://apps.apple.com/us/app/outlook/id413756345) app from the Apple Store if you haven't installed it yet.

2. Tap [Settings > Mail, Contacts, Calendars > Accounts > Add account > Email](https://support.office.com/en-us/article/office-mobile-apps-issues-ios-781e3078-5b45-4f1f-b6f2-f6a35f8f3026).

If you already have it installed, open it, then tap [Settings > Add Account](https://support.office.com/en-us/article/office-mobile-apps-issues-ios-781e3078-5b45-4f1f-b6f2-f6a35f8f3026).

2. Tap [Office 365](https://support.office.com/en-us/article/office-mobile-apps-issues-ios-781e3078-5b45-4f1f-b6f2-f6a35f8f3026) if you have a work or school account in Office 365 for business.
3. Type your full email address, for example `samson@ucdenver.edu`, type your password, and then tap **Sign in**.

**TIP** If you get a time-out message, your password or other information might be incorrect. Retype the information, and then try again.

**NOTE** If you previously selected Exchange to set up your account you may receive a message about security upgrades and you'll need to re-sign in. Follow the prompts and sign in with your full email address and password.
3. Enter your full email address, for example samson@ucdenver.edu, and your password, and then tap Next.

4. By default, Mail, Contacts, and Calendar information are synchronized. Tap Save.
Use Outlook for iOS

4. Select **Yes** to let the app access your info. Outlook for iOS begins syncing.

5. Tap one of the icons to view your calendar, files, or contacts in the app.

6. To learn more about using Outlook for iOS, tap **Settings > Help**. Or, see Frequently asked questions about Outlook for iOS and Android.

**Add another account**

1. You can have more than one email account in Outlook for iOS. Tap **Settings > + Add Account**.

2. Go back to the top of this page and **select the type of account you want to add**.

**Delete an account**

1. Tap **Settings**.

2. Tap the account you want to delete.

Use the built-in iOS mail app

5. If you're prompted to create a passcode, tap **Continue** and type a numeric passcode. If you're prompted and don't set up a passcode, you can't view this account on your device. You can also set up a passcode later in your settings.

Not working? Make sure you entered your email and password correctly and try again. You can also try setting the account up manually following the steps in the section **Set up IMAP or POP email accounts**, but selecting this method will only add your email, not your calendar or contacts.

Learn about other Office 365 resources for iOS in the **See Also** section at the bottom of this page.
3. Select **Remove Account**, and then select **From Device** or **From Device & Remote Data**.
