Clinical Science Program Course Book 2020-2021

CLINICAL SCIENCE COURSES

CLSC 6060  Analysis, Modeling, and Design  3.0 cr.
Dr. E. Dincelli (ersin.dinelli@cuanschutz.edu) (Fall)
Cross listed: CU Denver ISMG 6060. Prereq: Application development experience.
Provides an understanding and application of systems analysis and design processes. Students are exposed to system development life cycle (SDLC), structured systems analysis and design methods, object-oriented analysis and design methods, prototyping and commercial off-the-shelf package software approaches, and joint and rapid application development. Emphasizes the skills required for system analysts such as analytical, interpersonal, technical, fact-finding, and project management skills. Topics include data, process and object modeling, input-output and user interface design, and systems implementation and support. To provide an opportunity to develop these skills, an information system project is completed by a group of students. Students use a Case tool for their group project.

CLSC 6080  Database Management Systems  3.0 cr.
Dr. M. Mannino (michael.mannino@cuanschutz.edu); Z. Walter (zhiping.walter@cuanschutz.edu) (Fall)
Cross listed: CU Denver ISMG 6080. Prereq: Application development experience.
The success of today’s business often hinges on the ability to utilize critical information to make the right decisions quickly and efficiently. Transforming mountains of data into critical information to improve decision making is a skill every business decision maker must possess. This focus course covers the database design topics with a focus on enabling business decision making. Detailed topics include collecting, capturing, querying and manipulating data (using SQL and QBE) for simple to medium complex database applications. Commercial database products (e.g. ORACLE and ACCESS) are utilized to demonstrate the design of database applications in management, marketing, finance, accounting, and other business areas. Students will be able to design and implement simple to medium complex database applications after successful completion of this course.

CLSC 6210  Research Seminars in Clinical Science  1.0 cr.
Dr. A. Prochazka (allan.prochazka@cuanschutz.edu) (Fall, Spring)
Course is taken over two semesters (register once)
This course provides an overview of the types of clinical translational studies being conducted by senior CLSC doctoral students. The interactive seminar series structure allows for interdisciplinary scientific dialogue among students at various stages of training, mentors and faculty.

CLSC 6211  Immersion in Community Engagement  3.0 cr.
Dr. L. Cicotto (cicuttol@njhealth.org) and Dr. J. Westfall (jack.westfall@cuanschutz.edu) (Summer)
Prereq: Program consent (contact CLSC administrator for consent)
This course focuses on community-based participatory research, community engagement and understanding health disparities through a community immersion experience.

CLSC 6260  Conducting Clinical Trials for Investigators  2.0 cr.
Dr. B. Hammack (Barbara.Hammack@cuanschutz.edu) (Summer)
Prereq: For non-CLSC students, please seek consent of the instructor.
This course is designed for investigators involved in the operations of conducting clinical trials. The course will cover good clinical practices and regulations that surround setting up and running clinical trials. Clinical studies and popular press articles highlighting what can go wrong in clinical trials will be reviewed and discussed.

CLSC 6270  Critical Appraisal Seminars in Clinical Science  1.0 cr.
Dr. L. Cicotto (cicuttol@njhealth.org) (Fall)
This course provides an overview of the approaches for the critically appraising common study designs published in the clinical and translational sciences literature, as well as other sources of information.
Clinical Science Program Course Book
2020-2021

CLSC 6300  Scientific Grant Review Process: CCTS1 Proposals – Masters 1.0 cr.
Drs. K. Nadeau (kristen.nadeau@cuanschutz.edu) and J. Maloney (james.maloney@cuanschutz.edu) (Spring)
Prereq: Completion of required courses in biostatistics (BIOS 6601 and 6602 or BIOS 6611 and 6612).
Students will understand and participate in the process of scientific review of human subject research protocols submitted to the University of Colorado Denver Clinical Translational Research Centers at University Hospital and The Children's Hospital.

CLSC 6560  Designs and Mixed Methods in Implementation Research 2.0 cr.
Dr. J. Holtrop (jodi.holtrop@cuanschutz.edu) and B. Dorsey Holliman (brooke.dorseyholliman@ucdenver.edu) (Spring)
This course is for D&I Certificate Students
This course provides an in-depth examination of study designs, comparative effectiveness research, and qualitative, quantitative and mixed methods approaches to dissemination and implementation research. The focus is application to health care and public health settings.

CLSC 6580  Qualitative and Mixed Methods in Health Research 3.0 cr.
Dr. B. Dorsey Holliman (brooke.dorseyholliman@ucdenver.edu) and J. Holtrop (jodi.holtrop@cuanschutz.edu) (Spring)
This course is for CLSC Students
This course provides an in-depth examination of qualitative and mixed methods approaches that are pertinent to health research.

CLSC 6560  Guided Research Tutorial – Masters 1.0-3.0 cr.
Dr. Lisa Cicutto (jicuttol@njhealth.org) (Fall, Spring, Summer)
Prereq: Program consent, approved course plan (contact CLSC administrator for consent)
This is an independent study course developed by the student and appropriate faculty member based on the area of study. Students meet regularly with the selected course instructor. The student and course instructor will develop a course plan prior to registration of the course.

CLSC 6653  Key Concepts in Neuro DEVELOPMENTAL DISABILITIES 1 2.0 cr.
S. Friedman and D. Johnson (dina.johnson@cuanschutz.edu) (Fall)
Prereq: A degree in health care profession or related field or instructor consent.
Course represents part one of two-part interdisiplinary course series focused on systems, options for diagnosis/assessment and alternatives for service provision related to children/youth/young adults with neurodevelopmental and related disabilities and their families to address this population’s special health care needs.

CLSC 6654  Key Concepts in Neuro DEVELOPMENTAL DISABILITIES 2 2.0 cr.
S. Friedman and D. Johnson (dina.johnson@cuanschutz.edu) (Spring)
Prereq: A degree in health care profession or related field and completion of CLSC 6653, or Instructor consent.
This course represents part two of a two-part interdisciplinary course series focused on service provision, intervention strategies and service provision related to children/youth/young adults with neurodevelopmental and related disabilities and their families to address this population’s special health care needs.

CLSC 6661  Leadership Dialogues I 2.0 cr.
Dr. K. Kennedy. Program contact: Dina Johnson (dina.johnson@cuanschutz.edu) 303-724-7673 (Summer)
Prereq: A degree in health care profession or related field or instructor consent.
This interdisciplinary leadership course focuses on leadership strategies needed for providing family-centered, culturally competent, community-based services for children with special needs and their families.

CLSC 6662  Leadership Dialogues II 1.0 cr.
Dr. K. Kennedy. Program contact: Dina Johnson (dina.johnson@cuanschutz.edu) 303-724-7673 (Spring)
Prereq: A degree in health care profession or related field or Instructor consent, CLSC 6661
This interdisciplinary leadership course focuses on becoming change agents to better provide family-centered, culturally competent, community-based services for children with special needs and their families.

CLSC 6663  Intervention for Individuals with Developmental Disabilities 3.0 cr.
S. Friedman and R. Charlifuie-Smith. Program contact: Dina Johnson (dina.johnson@cuanschutz.edu) 303-724-7673 (Spring)
Prereq: A degree in health care profession or related field or Instructor consent.
This interdisciplinary course reviews evidence-based practices in intervention for children with autism and other neurodevelopmental disorders, presented through lectures, critical readings of the literature, case discussions, and case presentations.

CLSC 6664  Leadership Dialogues III 1.0 cr.
Dr. K. Kennedy. Program contact: Dina Johnson (dina.johnson@cuanschutz.edu) 303-724-7673
Prereq: Degree in health care profession or related field or consent of instructor. Restrictions: Instructor Consent.
This interdisciplinary leadership course focuses on leadership strategies needed for providing family-centered, culturally competent, community-based services for children with special needs and their families. (Nursing only)

Clinical Science Program Course Book
2020-2021

CLSC 7102  Grant Writing II  1.0 cr.
Dr. L. Cicutto (cicuttol@njhealth.org) (Spring); M. Plomondon (meg.plomondon@cuanschutz.edu) (Fall)
Prereq: Program consent (contact CLSC administrator for consent) BIOS 6601 and EPID 6630, CLSC 7101. For non-CLSC students, please seek consent of the instructor. This course builds on CLSC 7101 and further prepares students for subsequent grant submissions. Strategies for preparation (including hypothesis generation, experimental design, statistical considerations, and potential problems) will be discussed. At the end of the course, a KO8, R23, or equivalent national grant application will be completed for submission. A fully prepared grant submission is required at the end of the course.

CLSC 7150  Ethics and Responsible Conduct of Research  1.0 cr.
Dr. L. Ensign (lisa.ensign@cuanschutz.edu) (Fall, Spring)
Prereq: Program consent (contact CLSC administrator for consent). This course will provide an overview of the field of ethics in clinical research. It is designed for investigators who will be conducting research involving human subjects. Participants will learn the historical background, current regulations, and IRB requirements related to human subjects protection issues. Hands-on experiences will be provided to participants to learn how to develop approaches to address conducting ethical human subjects’ research in an optimal manner. In addition, participants will learn the essentials of responsible conduct of research.

CLSC 7202  Clinical Outcomes and Applications  3.0 cr.
Drs. C. Battaglia (catherine.battaglia@cuanschutz.edu) and R. Everhart (rachel.everhart@cuanschutz.edu) (Fall)
Prereq: (BIOS 6601 and BIOS 6602) or (BIOS 6611 and EPID 6630). For non-CLSC students, please seek consent of the instructor. This course provides students with both the theory of clinical outcomes research and an opportunity to apply it through case studies. Clinical Outcomes Research focuses on methodologies used in clinical care, costs, health systems, policy and health outcomes research.

CLSC 7300  Scientific Grant Review Process: CCTSI Proposals – Doctoral  1.0 cr.
Drs. K. Nadeau (kristen.nadeau@cuanschutz.edu) and J. Maloney (james.maloney@cuanschutz.edu) (Spring)
Prereq: Completion of required core courses in biostatistics (BIOS 6601 and BIOS 6602 or BIOS 6611 and EPID 6630). Students will understand and participate in the process of scientific review of human subject research protocols submitted to the University of Colorado Denver Clinical Translational Research Centers at University Hospital and The Children's Hospital.

CLSC 7650  Guided Research Tutorial – Doctoral  1.0-3.0 cr.
Dr. L. Cicutto (cicuttol@njhealth.org) (Fall, Spring, Summer)
Prereq: Program consent (contact CLSC administrator for consent), approved course plan. This is an independent study course developed by the student and appropriate faculty member based on the area of study. Students meet regularly with the selected course instructor. The student and course instructor will develop a course plan prior to registration of the course.

CLSC 7653  Dissemination and Implementation Research in Health  3.0 cr.
Drs. B. Rabin (borsika.rabin@cuanschutz.edu) and C. Studts (christina.studts@cuanschutz.edu) (Fall)
Prereq: Program consent (contact CLSC administrator for consent)
Introduces dissemination and implementation (D&I) research and practice in the context of health (i.e., translational research in health).

CLSC 7663  Context and Adaptation in Dissemination & Implementation Research  2.0 cr.
Drs. C. Studts (christina.studts@cuanschutz.edu) and B. Rabin (borsika.rabin@cuanschutz.edu) (Spring)
Prereq: CLSC 7653 and Dissemination Implementation Research in Health; Program consent (contact CLSC administrator for consent)
This course covers concepts, frameworks, and methods for understanding and assessing context and guiding adaptations as relevant to dissemination and implementation (D&I) health research and practice.

CLSC 8990  Doctoral Thesis  1.0-10.0 cr.
Dr. L. Cicutto (cicuttol@njhealth.org) (Fall, Spring, Summer)
Prereq: Program consent (contact CLSC administrator for consent)
This course involves the student working with his/her research mentor and research project committee to develop, design and execute a clinical science doctoral study as well as to write up the project as a thesis. This course is the capstone to the PhD degree. Work may be associated with preparing for the written and oral component of the thesis defense examination.

REQUIRED CORE COURSES

BIOS 6601  Applied Biostatistics I  3.0 cr.
Applied biostatistical methods including descriptive and statistical inference; odds ratio and relative risk, probability theory, parameter estimation, tests for comparing statistics of two or more groups, correlation and linear regression and overviews of: multiple and logistic regression and survival analysis.

BIOS 6602  Applied Biostatistics II  3.0 cr.
Prereq: BIOS 6601. A continuation of BIOS 6601 extending the basic principles of descriptive and inferential statistics to modeling more complex relationships using linear regression, logistic regression, Poisson regression, and Cox regression. The statistical package SAS is used extensively.

</tbody>
</table>

**Prerequisites and Restrictions**

- Prereq: Calculus 1 and 2 with at least a B; a previous course in applied probability and statistics with at least a B; coursework or experience with a statistical package (e.g. SAS, R, Stata, SPSS); linear algebra is highly recommended and will be used extensively in the course; or permission of instructor. Students without this preparation, or seeking a less challenging course, should consider BIOS 6601/6602. This course in applied statistics covers simulation, random sampling, nonparametric inference for the twosample location problem; ANOVA, ANCOVA, and multiple linear regression. Matrix notation, R and SAS are used.
- Prereq: BIOS 6611. This is a continuation of BIOS 6611 covering univariate linear modeling and emphasizing multiple regression and analysis of variance. Logistic regression and methods for correlated data are also covered. Matrix algebra and the statistical package SAS will be used.
- Prereq: BIOS 6611 or consent of instructor. Restrictions: Offered in odd years. Design and conduct of clinical research studies. Intended for non-biostatistics students. Topics include specifying the research question, study endpoints, study populations, study interventions, sample size evaluation, and choice of comparison groups. Common study designs and methods for study conduct are described.

**Special Notes**

- The SAS course is not a prerequisite but is strongly encouraged.
- Students without the preparation in calculus, probability, and statistics are recommended to consider BIOS 6601/6602.

Clinical Science Program Course Book
2020-2021

Cancer is the second leading cause of death in the United States. This course offers an overview of recent research into the causes, treatments and possible prevention of cancer. Includes a detailed look at the mechanisms of action of various oncogenes. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4634.

BIOS 6606  Statistics for the Basic Sciences  3.0 cr.
Restrictions: Enrollment in UCD-AMC graduate program or permission of the instructor. This course is designed for those wishing to obtain a basic understanding of statistics and its applications in biological research. Students will develop statistical literacy and an ability to perform basic statistical analyses, basic graphical statistics, data summarizations, and estimation and inference using statistical software.

BIOS 6621  Statistical Consulting I  1.0 cr.
Coreq: BIOS 6611 and consent of instructor/program director.
Students will gain experience with statistical consulting and common statistical problems and techniques encountered in consulting through a combination of real examples and consultations with investigators. Emphasis will be on methods for effective consulting and communication with investigators.

BIOS 6631  Statistical Theory I  3.0 cr.
Prereq: Differential and integral calculus.
This course presents an introductory coverage of the theory of discrete and continuous random variables and applications to statistical problems. Topics include probability theory, transformations and expectations, common families of distributions, multiple random variables, and properties of a random sample.

BIOS 6632  Statistical Theory II  3.0 cr.
Prereq: BIOS 6631 and differential and integral calculus. This course covers theoretical and applied fundamentals of statistical inference. The course is a continuation of BIOS 6631. The primary topics include point estimation, hypothesis testing, interval estimation and asymptotic methods.

BIOS 6646  Survival Analysis  3.0 cr.
Pre/Coreq: BIOS 6612 and BIOS 6632 or instructor permission. Restrictions: Offered in even years.
This course covers the analysis of time-to-event data with applications to biology, medicine, and public health. Nonparametric methods for group comparisons and semi-parametric regression models will be emphasized. Parametric methods and distribution theory for survival analysis will also be included.

BIOS 6649  Clinical Trials: Statistical Design and Monitoring  3.0 cr.
Pre/Coreq: BIOS 6612 or instructor permission. Restrictions: Offered in odd years.
Statistical and scientific design of clinical trials. Intended for biostatistics graduate students. Topics include scientific and statistical aspects of the research question, endpoints, treatments, sample size evaluation. A wide range of trial designs including group sequential and adaptive trial designs are covered.

BIOS 6655  Statistical Methods in Genetic Association Studies  3.0 cr.
Prereq: BIOS 6612 or permission of instructor. Restrictions: Offered in variable years.
This course is designed to give an introduction to statistical methods in genetic association studies. Topics include an introduction to population genetics topics relevant to genetic association studies, design strategies, and analysis methods for case-control and family data.

BIOS 7712  Statistical Methods for Correlated Data  1.0 cr.
Prereq: BIOS 6643. Restrictions: offered variable years.
This course will cover statistical models and methods for correlated data, including autoregressive models, Markov models, and Markov chain Monte Carlo methods.

BIOS 7713  Statistical Methods for Missing Data  1.0-2.0 cr.
Prereq: BIOS 6643. Restrictions: offered variable years in either 1 credit or 2 credits course version. This course covers methodological research being carried out for longitudinal studies with missing data. Topics may include missing data mechanisms, non-ignorable missing data, multiple imputation, mixture models and sample size determinations. 1 credit or 2 credit course versions offered in variable years.

CBHS 6610  Social and Behavioral Factors in Health  3.0 cr.
Considers social, behavioral, and cultural factors that affect the health of individuals and populations, and contribute to health disparities. Development, implementation and evaluation of programs and policies to promote and sustain healthy environments and lifestyles are examined. Online in summer.

CBHS 6611  Foundations of Health Behavior  3.0 cr.
Course will cover basic theories, concepts, models from a range of social/behavioral disciplines used in public health research and practice. Applications of theoretical frameworks in specifying multiple targets and levels of intervention to public health research will be addressed.

CBHS 6612  Methods in Research and Evaluation  3.0 cr.
Prereq: BIOS 6601. EPID 6630 recommended prior to this course.
Course covers social science research methods, including qualitative/quantitative research designs, data collection, and program evaluation (formative, process, outcome), to assess effectiveness of public health programs.
Clinical Science Program Course Book  
2020-2021

CBHS 6620  Survey Research  
2.0 cr.
Course examines survey research methodology, including face-to-face, telephone, mail and Internet surveys, includes: developing and ordering questions; formatting; reliability and validity; sampling; implementation; maximizing response rate; data issues; survey ethics and reporting.

CBHS 6624  Community Health Assessment  
3.0 cr.
Prereq: EPID 6630 and either CBHS 6610 or CBHS 6611.
Course teaches how to assess the social, cultural, economic, physical and environmental components of population health. Students use national/local demographic and health data. Includes working with community clients and off-campus community-based fieldwork.

CPBS 7655  Statistical Methods in Genetic Association Studies  
3.0 cr.
Prereq: BIOS 6612 or permission of instructor.
This course is designed to give an introduction to statistical methods in genetic association studies. Topics include an introduction to population genetics topics relevant to genetic association studies, design strategies and analysis methods for case-control and family data. Cross-listed: BIOS 6655.

CPBS 7659  Statistical Methods in Genomics  
3.0 cr.
Prereq: BIOS 6611 or equivalent graduate level statistics course with consent of instructor.
This course will give an introduction to statistical methods for analyzing molecular sequences and genomic data. Topics include hidden Markov models for sequence alignment, molecular evolution and gene expression data analysis. Cross-listed Course: BIOS 6659 (sponsoring department)/BIOS 7659.

CPBS 7660  Analysis of Genomics Data Using R and Bioconductor  
2.0 cr.
Pre/Coreq: BIOS 6602 or 6612, or consent of instructor
This course provides students with hands on experience in solving real life biological problems using the statistical software R and Bioconductor. Students will work and communicate with participating researchers and clinicians on their case studies of genomics data.

CPBS 7711  Methods and Tools in Biomedical Informatics  
4.0 cr.
Prereq: Permission of instructor.

DPR 5151  Motor Control & Motor Learning  
2.0 cr.
This course presents the foundation of motor learning and control as it applies to optimal movement across the lifespan. Emphasis is on variables related to task composition, the environment and augmented information that enhance practice of motor skills. These principles are applied to physical therapist practice.

DSEP 6000  Academic Writing for Doctoral Students  
1.0 cr.
Tailored for graduate students in education. Focuses on techniques for improving academic writing, particularly planning, organizing, drafting, revising, and editing papers, i.e. course assignments, portfolio products, doctoral proposals or dissertation chapters. Prereq: Admission to doctoral program. Repeatable.

EHOH 6614  Occupational and Environmental Health  
3.0 cr.
Students will learn about the relationship between the environment, workplace and health. Topics include facets of industrial hygiene, air and water pollution, radiation monitoring, toxicology, occupational medicine, policy, environmental justice and sustainability. Methods include risk assessment, GIS and epidemiology.

EHOH 6616  Environmental & Occupational Toxicology  
3.0 cr.
Prereq: EHOH 6614.
Presents an overview of information needed to assess the relationship between the environment, workplace and health. Topics include facets of industrial hygiene, air and water pollution, radiation monitoring, toxicology studies, clinical occupational medicine and biologic monitoring.

EHOH 6617  Environmental & Occupational Epidemiology  
3.0 cr.
Prereq: EHOH 6614.
Overall goal of course is to provide a background in epidemiology of diseases related to environmental and/or occupational exposures. Application of epidemiologic research methods to determine and prevent such diseases will be discussed.

EHOH 6618  Environmental Health Policy and Practice  
3.0 cr.
Prereq: EHOH 6614.
Examine the environmental policy-making and planning and regulatory and non-regulatory approaches to controlling environmental hazards. A wide variety of topics will be introduced with cross-disciplinary perspectives ranging from water and air to the built environment and climate change.

EHOH 6619  Environmental Exposures and Health Effects  
3.0 cr.
Prereq: EHOH 6614 Coreq: EPID 6630.
This course integrates earth sciences, exposure sciences and biological sciences to understand conditions and circumstances of recent env/occ exposure events, the methods to assess exposures; and related health impacts. Case studies and laboratory exercises are used to guide instruction.
Clinical Science Program Course Book
2020-2021

EPID 6622  Cancer Prevention and Control  2.0 cr.
Prereq: EHOH 6414, EPID 6630  Restriction: Offered in alternate years
Course provides an overview of preventable cancers, epidemiology and contributing factors. Phases of cancer control research and appropriate methodologies are discussed. Basic principles of intervention development are reviewed. Psychosocial issues related to cancer are discussed. Students research topic related to course.

EPID 6629  Clinical Epidemiology  2.0 cr.
Prereq: EPID 6630  Restriction: Offered in variable years.
This course provides an overview of the design, conduct and appraisal of clinical research. Topics include study design, issues in randomized trials, measurement error, assessment of diagnostic and screening tests, measurement of health-outcomes, meta-analysis and use of questionnaires.

EPID 6635  Communicable Disease Epidemiology  2.0 cr.
Prereq: EPID 6630.
This overview course covers a broad range of topics including basic epidemiologic concepts, vaccines, emerging pathogens, hospital infection control, foodborne illness and outbreaks. Specific pathogens are also reviewed due to their public health importance or their ability to demonstrate important epidemiologic principles.

EPID 6636  Chronic Disease Epidemiology  3.0 cr.
Prereq: EPID 6630.
The epidemiology of major chronic diseases of Western countries will be reviewed including heart disease, cancer, stroke, diabetes, neurological diseases, and selected other conditions. Methodologic issues related to the study of these diseases, disease surveillance and strategies for prevention will also be covered.

EPID 6637  Injury & Violence Epidemiology and Prevention  2.0 cr.
Prereq: EPID 6630 or permission of Instructor.  Restriction: Offered in even years.
Students will learn the major causes of and risk factors for injuries and violence, identify and use key data sources to characterize injury problems, develop and evaluate injury control and prevention strategies, critically analyze literature and explore injury related research questions.

EPID 6638  Global Cardiovascular Epidemiology  2.0 cr.
Prereq: EPID 6630.  Restriction: Offered variable terms and years
A review of the major issues in global cardiovascular disease epidemiology, including trends, the extent of the disease nationally and internationally, implications of major epidemiologic studies, and strategies for prevention. Emphasis of the course will be on review and interpretation of the cardiovascular epidemiology literature.

EPID 6646  Introduction to Systematic Reviews  1.0 cr.
Prereq: EPID 6630, or permission of instructor.  Restriction: Offered in variable years
Introduces methods of conducting systematic reviews to identify the best available evidence about health and public health interventions. Topics will include the design and implementation of reviews, publication bias, search strategies, meta-analysis and reporting results through the Cochrane library.

EPID 7632  Advanced Epidemiology  3.0 cr.
(Spring) Prereq: EPID 6630, EPID 6631, BIOS 6601
This is an advanced course on epidemiologic methods designed to improve the student's ability to conduct and interpret observational epidemiologic studies.

EPID 7640  Genetic Epidemiology  2.0 cr.
Prereq: EPID 6630, BIOS 6601.  Restriction: Offered alternate years.
This course will be a problem-based class, covering basic genetic principles and teaching epidemiologic methods employed in the investigation of the genetic susceptibility to chronic disease.

EPID 7911  Epidemiologic Field Methods  1.0-4.0 cr.
Prereq: EPID 6626, EPID 6630, EPID 6631, EPID 6632, BIOS 6611, BIOS 6612. Course Restrictions: Enrollment in Epidemiology PhD Program or permission of Instructor.
Ph.D. students have the opportunity to work with faculty on current epidemiologic projects to develop skills in field research, proposal writing, budget development, staff hiring and training, protocol and instrument development and implementation, and specific methods topics.

EPID 7915  Analytic Methods in Epidemiology  1.0-4.0 cr.
Prereq: EPID 6626, EPID 6630, EPID 6631, EPID 6632, BIOS 6601/BIOS 6602 or BIOS 6611/BIOS6612. Course Restrictions: Permission of instructor is required.
Advanced treatment of techniques in the analysis of epidemiological studies, including longitudinal, time-dependent, survival data, causality, missing data, etc. Students will analyze data sets currently on file using contemporary epidemiological methods.

HMGP 7600  Survey of Human Genetics  3.0 cr.

For edits, additions, and/or deletions please contact galit.mankin@cuanschutz.edu
Clinical Science Program Course Book
2020-2021

Survey of human genetics, including Mendelian and other types of inheritance, chromosomes and cytogenetics, molecular and biochemical basis of genetic disease, quantitative genetics and gene mapping, developmental and cancer genetics, clinical genetics, and genetic screening and prenatal diagnosis.

**HMGP 7620 Advanced Genome Analysis**
2.0 cr.
Introduction to genomics emphasizing gaining familiarity with: analysis, utilization of genomic data. Topics: sequencing, mapping genomes, transcriptomics, human genome, evolution, genomic disorders, bioinformatics, statistics, population variation, epigenomics, proteomics, metagenomics, microbiome analysis, functional genomics, ethics. Crosslisted Course: CPBS 7620, STBB 7620, and MICB 7620

**HSMP 6602 Health Equity**
3.0 cr.
Addresses health inequities affecting the poor, racial and ethnic minorities, prisoners, rural residents, disabled, GLBTI and other populations. The course studies: 1) measurement/data issues in health inequity research; 2) institutionalized, personally mediated and internalized causes; and 3) solutions/challenges.

**HSMP 6605 Health Policy**
3.0 cr.
Course focuses on important U.S. health policy issues and analysis, implementation, and communication skills for the practice of health policy. Evaluation is based on in-class labs, group projects, and analysis paper of a health policy case example.

**HSMP 6606 Public Health Administration**
2.0 cr.
Course provides an introduction to public health management and administration. Components aim to stimulate interactions around important problems and issues including managerial decision-making and increasing practical knowledge, tools, and strategies required by organizational decision-makers. Business plans are produced.

**HSMP 6608 Ethical and Legal Issues in Public Health**
2.0 cr.
Course explores the legal and ethical dimension of public health. It focuses on topics that generate legal and ethical controversies, including governmental duties to protect citizens, nature and extent of the government’s ability to regulate conduct, and responses to epidemics.

**HSMP 6609 Cost Benefit and Effectiveness in Health**
2.0 cr.
Prereq: HSMP 6604 or permission of instructor.
Introduces students to the basics of economic evaluations of health care interventions or technology. Economic evaluations provide a method to assimilate different cost and health outcomes associated with medical treatments into a common metric.

**HSMP 6616 Introduction to Health Policy Analysis and Communication**
1.0 cr.
Introduces a framework for systemically and critically evaluating the health policy literature. Reviews effective oral and written communication skills for presenting policy analyses. Evaluation is based on a written analysis of a policy paper of the student’s choosing.

**IDPT 7200 Scientific Writing for Doctoral Students**
2.0 cr.
Restrictions: Must have passed preliminary examination; permission of instructor.
Scientific writing course for students engaged in research. Focuses on critical thinking, analytical writing, and oral presentation. Taught as a writing workshop, the course emphasizes effective communication with both professional and non-technical audiences.

**IDPT 7646 Tissue Biology and Disease Mechanism**
3.0 cr.
Prereq: IDPT 7811, IDPT 7812, IDPT 7813, IDPT 7814, IDPT 7815.
This course provides an overview of organ systems and disease through 1) a survey of the major systems, including the cellular and molecular mechanisms underlying their function and repair, integrated with 2) common diseases, current therapies, and their mechanistic basis.

**IMMU 7662 Immunology**
6.0 cr.
This course covers the basic principles of the immune system. Included are discussions on (i) the innate and adaptive immune responses, (ii) the molecular and cellular basis of immune specificity and (ii) aspects of clinical immunology.

**MICB 7701 Molecular Virology and Pathogenesis**
3.0 cr.
Prereq: MICB 7706, MICB 7705 are desirable but not required. Restrictions: Permission of Instructor.
Topics in this course include viral structure and genome organization, replication and expression of viral genomes, mechanism of action of tumor viruses, molecular aspects of virus-host cell interactions, animal models of infectious diseases and pathogenesis of human viruses.

**MICB 7702 Molecular Mechanisms of Bacterial Disease**
3.0 cr.
Restrictions: Permission of the instructor.
Course focuses on molecular processes that bacteria utilize to cause disease in humans. The course content will use specific examples from pathogenic bacteria to illustrate common virulence mechanisms utilized to initiate, maintain and survive interactions with host cells.

**MICB 7704 Host Response to Infectious Disease**
1.0 cr.
Clinical Science Program Course Book
2020-2021

Prereq: Biomedical Core Courses.
This interactive graduate course, which provides an overview and specific examples of the host response to infectious disease. Current research and future directions in the field are discussed. Students are assessed via presentations, participation, and an exam.

**MICB 7705  Medical Microbiology**  
The course will focus on Microbiology, Infectious Diseases. Course content will focus on: pathogenicic bacteria, viruses, fungi, parasites; emphasis on microbial virulence determinants, host-pathogen interactions emphasizing host immune responses, signs, symptoms of disease presentation, epidemiology, and diagnosis of infectious diseases.

**NRSC 7600  Cellular & Molecular Neurobiology**  
A comprehensive, in-depth, discussion-based course intended for candidates for the PhD in Neuroscience. Topics include ion channel structure and function, ionic basis of the resting and action potential, and the biochemistry and physiology of direct and indirect synaptic transmission.

**NRSC 7610  Fundamentals of Neurobiology**  
Prereq: NRSC 7600 or equivalent at the discretion of the instructors.  
This course will provide basic knowledge on the structure and function of the nervous system. The lectures will be supplemented by discussion of primary research literature in neurobiology.

**NURS 6274  Semantic Representation**  
D. Skiba (diane.skiba@cuanschutz.edu) 303-724-8527  
Introduces the concept of classifying nursing phenomena to facilitate data management and retrieval. Topics include: minimum data sets, nursing language, classification systems and vocabularies, and relates each topic to nursing practice, administration, and research.

**NURS 6279  Knowledge Management**  
D. Skiba (diane.skiba@cuanschutz.edu) 303-724-8527  
Prereq: Minimum of one informatics course or permission of instructor.  
The need for knowledge discovery, distribution, and management in clinical settings is examined. Knowledge Management techniques (probabilistic/statistical models, machine learning, data mining, queuing theory, computer simulation) are examined. The specification of a knowledge management comprehensive system for healthcare is developed.

**NURS 6284  Digital Health Tools**  
D. Skiba (diane.skiba@cuanschutz.edu) 303-724-8527  
This course examines the use of digital tools to foster engagement of patients, families and consumers in their health care. This course examines the evidence and the legal, ethical, social and policy issues within the context of connected health.

**NURS 6285  HCI Design Principles**  
D. Skiba (diane.skiba@cuanschutz.edu) 303-724-8527  
Examines the relationship of interface design to effective human interaction with computers. This course examines principles, theory and models to design and evaluate optimal interfaces to promote human computer interaction in health care informatics applications.

**NURS 6286  Foundations Informatics**  
D. Skiba (diane.skiba@ucdenver) 303-724-8527  
This introductory course focuses on core concepts, skills, tools that define the informatics field and the examination of health information technologies to promote safety, improve quality, foster consumer-centered care, and efficiency.

**NURS 6794  Decision Support**  
D. Skiba (diane.skiba@cuanschutz.edu) 303-724-8527  
This course focuses on decision making models and their application using diverse data sources for high quality and safe care delivery. Decision support tools used in various health settings will be explored.

**PHSC 7310  Fundamentals of Pharmaceutical Sciences**  
Cross-listed: TXCL7310  
Core course explores key aspects of Pharmaceutical Sciences. Major themes will focus on macromolecular interactions, pharmaceutics, pharmacokinetics, pharmacodynamics, apoptosis, signal transduction and immunology. Critical thinking and problem solving skills will be emphasized via lectures, discussions, and computer-based data analyses.

**PHOR 7611  Applied Cost-Effectiveness Modeling**  
(Fall) Prereq: HSMP 6609 Cost Benefit/Cost Effectiveness Analysis. Restrictions: Successful completion of HSMP 6609 or permission of primary instructor.  
This is an applied course in cost-effectiveness analysis. This course will apply the theory and methods learned in HSMP 6609 to develop competency in conducting cost-effectiveness analysis in health and medicine. Students will complete their own cost-effectiveness model.

Rev. 10/13/20  For edits, additions, and/or deletions please contact galit.mankin@cuanschutz.edu
Clinical Science Program Course Book  
2020-2021

PHOR 7613  Pharmaceutical Economics  
3.0 cr.  
(Spring). Prerequisite: BIOS 6601 or 6611  
This course will cover the theoretical underpinnings of pricing and regulation in the pharmaceutical market. Students will gain an understanding of drug policy at the national and global level. Students will also employ methods for patient-level pharmacoeconomic analyses including techniques for analyzing utilization, patient preference, and cost data.

PHOR 7615  Pharmacoepidemiology  
2.0-4.0 cr.  
(Fall) Crosslisted: EPID 7615. Prereq: EPID 6630, 2-course biostatistics series (either BIOS 6601-6602 or BIOS 6611-6612) Consent of instructor to determine level of credit to be taken.  
This course builds upon fundamental concepts and methods of epidemiology, applied to the study of pharmaceuticals. Topics include: the FDA approved process, mechanisms of adverse drug effects, methods and data systems for studying drug-effect relationships, and evaluating published pharmacoepidemiology studies.

RPSC 7801  Molecular Mechanisms of Reproductive Endocrinology and Metabolism  
3.0 cr.  
Prereq: Core Courses IDPT 7811, IDPT 7812, IDPT 7813, IDPT 7814, IDPT 7815. Restrictions: CU-AMC grad students; others by permission of the Course Director.  
Endocrine systems will be covered from the molecule to the systems level. Pituitary secretions and their actions and regulation, regulation of water, ion, calcium balance, and regulation of metabolism including insulin secretion and action will be discussed, the context of normal physiology, the mechanisms of endocrine dysfunction.
