[Group Aims To Change Face Of Science, Starting With Database Of Women Scientists](#)

It all started when members of the group noticed a pattern: an overabundance of something they call ‘manels.’ “They are all-male panels,” says **Liz McCullagh**, a neuroscientist at the University of Colorado and a member of 500 Women Scientists. “And in particular in fields where we know there’s a lot of representation of women, it’s incredibly frustrating.”

[Portland woman diagnosed with cancer comes to Denver for life saving clinical trial](#)

A Portland woman who was diagnosed with cancer came to Denver for a clinical trial and it saved her life. Nichol Miller, a 45-year-old wife and mother of three, was diagnosed with soft tissue sarcoma in 2014.... So she came to Colorado for a clinical trial at the University of Colorado Cancer Center. “We decided to do the clinical trial because the only other option we were given was hospice,” Miller said.

[Operation Gun Debate: Two Trauma Surgeon Brothers Talk Guns and Injuries](#)

Ernest Eugene Moore, “Gene,” [Distinguished professor of the University of Colorado] has operated on thousands of people throughout his decades-long career and has written at least 1,700 scientific and medical papers. He has made such an impact on patients and young surgeons that Denver Health, the premier public hospital in Colorado where he has served for more than 40 years, named the trauma center after him: the Ernest E. Moore Shock Trauma Center.

Here's what marijuana actually does to your body and brain

"CHS [cannabinoid hyperemesis syndrome] is certainly not very rare," **Andrew Monte**, an associate professor of emergency medicine at UCHealth University of Colorado Hospital [and CU School of Medicine] who led the March study, previously told Business Insider. "We see it absolutely every week in our ER."

Study investigates use of texting in health care

While the study's results may seem disappointing, coauthor and CU School of Medicine cardiology professor **Fred Masoudi** said that his team's efforts have still contributed to science in a meaningful way. "At the end of the day, technology offers a lot of promise for improving health," he said. "But we don't know what that promise is unless we study it rigorously. Randomized trials like these are the way to ensure whether interventions are going to be successful or not."

[NYC study raises questions about undiagnosed asthma in US](#)

"A 20% rate of potentially undiagnosed asthma is alarming. None of us want to miss asthma," said **Matthew J. Greenhawt**, a pediatric allergist, associate professor of pediatrics and director of the Food Challenge and Research Unit at Children's Hospital Colorado [and associate professor of pediatrics at CU School of Medicine].

[State Lawmakers Aim To Temper Teen Vaping Rates With Big Tax Increases](#)

Robin Deterding, a pediatric pulmonologist with Children's Hospital Colorado [and professor of pediatrics at CU School of Medicine], said she thinks people will vote differently this time. "I think they understand the vaping crisis that we have for kids. They understand smoking, but they also understand vaping, we have to get on top of it," Deterding said.

[Mark Kennedy meets CU's medical community, and draws small protest, at Anschutz campus](#)

CU alum Donald Aptekar asked during the town hall whether presidential finalist **Mark Kennedy** would be in favor of continuing broad education in family planning services that include contraceptive education and abortion services. "Those are decisions made by the faculty and the department and the campus chancellors," Kennedy said. "I'm supportive of whatever teaching methodologies are used. I will support academic freedom and anybody who wants to infringe on that, I will be opposing that."

Denver Post, April 24, 2019

[Applause, laughter not in Mark Kennedy's favor at CU Anschutz open forum](#)

Mark Kennedy, the sole finalist for president of the University of Colorado system has talked about being a champion of diversity, supporting LGBTQ+ rights and protecting academic freedom, but some in the CU community just don't believe him.... "I am committed to inclusivity," he said in closing the forum. "I am committed to making that a hallmark of this university even more than it is today."
