Bioengineering is a highly interdisciplinary field that combines the mathematical and physical sciences with engineering principles to study biology, physiology, medicine, behavior and health. Bioengineering is emerging as the leading discipline at the interface of clinical sciences, basic research, and engineering and maintains focus on catalyzing technology to cure and prevent disease. The undergraduate bioengineering program provides training at both the Denver campus and the Anschutz Medical Campus.

The BS Bioengineering program emphasizes the professional competencies of leadership, communication, presentation and critical problem solving. These learning goals and the dual-campus model provide robust training for a variety of careers in the fast-growing biomedical and biotechnology industry. Graduates will also have an excellent foundation for continued education in science, engineering and medicine.

ACADEMIC ADVISING

Students admitted to the College of Engineering, Design and Computing (CEDC) who have declared a major should meet with an advisor in their specific department and should contact that department to schedule an appointment.

For Bioengineering academic advising, please contact the Bioengineering Undergraduate Program Manager:

Shaun Boulier

GENERAL GRADUATION REQUIREMENTS & POLICIES

All College of Engineering, Design and Computing (CEDC) students are required to complete the following minimum general graduation requirements:

1. Complete a minimum of 128 semester hours
2. Achieve a minimum 2.0 grade point average (GPA) for all courses attempted, for all required courses and for all courses taken within the student’s major department
3. Complete all CU Denver Core, CEDC, and major requirements
4. Complete a minimum of 30 CEDC hours as a declared CEDC student in good standing at CU Denver
5. Complete at least the final two semesters as an enrolled CEDC student

PROGRAM REQUIREMENTS & POLICIES

The following program requirements are based on degree requirements for the current Catalog year at CU Denver and are subject to change. Students are responsible for completing degree requirements based on the Catalog year for which they are admitted.

Students are responsible for meeting with the Undergraduate Program Manager in Bioengineering to confirm major requirements. Students completing the Bioengineering B.S. Degree are required to complete the following minimum program requirements:

1. Complete a minimum of 128 semester hours.
2. Complete 24 semester hours of CU Denver Core Curriculum coursework.
3. Complete a minimum of 58 semester hours of pre-major coursework with a grade of C – or better and a 2.0 GPA or higher.
4. Complete a minimum of 46 semester hours of upper-division bioengineering coursework, including 12 semester hours of approved technical electives with a grade of C- or higher in each course. All upper-division bioengineering courses are taught at the Anschutz Medical Campus (AMC). Of the twelve technical elective hours, a minimum of 9 credit hours must be taught within the Department of Bioengineering.

COURESWORK THAT CAN BE COMPLETED AT PREVIOUS INSTITUTION

The following is a “bucket” of requirements students can complete prior to transferring to CU Denver, including equivalent Colorado Community College System (CCCS) courses. To determine the equivalencies of courses to be completed at non-CU Denver institutions, students can visit www.transferology.com. It is critical students connect with a CU Denver academic advisor to ensure planned courses will transfer and apply to CU Denver degree requirements. All non-CU Denver coursework must be completed with a C- or better to be eligible for transfer.
FOR TRANSFER STUDENTS

Students interested in completing an Associate (A.A. or A.S.) Degree or a Colorado Statewide Transfer Articulation Agreement or Degree with Designation (DWD) must work with their community/junior college academic advisor to create an academic plan that accounts for all degree or transfer articulation agreement requirements. Colorado Community College Students may also explore the option to complete Reverse Transfer at CU Denver.

- The applicability of Guaranteed Transfer (GT Pathways) courses to specific CU Denver Core Curriculum requirements requires completion of a block of five courses: two GT-AH course; one GT-HI course; one GT-SS course; and one additional GT-AH, GT-HI, or GT-SS course.

**SAMPLE PLAN – COURSEWORK TO BE COMPLETED AT CU DENVER**

Based on successful completion of applicable transfer credits and the complete “bucket” of requirements outlined above, students would have the following remaining to complete at CU Denver. At CU Denver, students must tailor this plan based on the evaluation of previously completed college coursework (e.g., AP, IB, CLEP, dual/concurrent enrollment, and transfer credit), course availability, individual preferences related to course load, summer term courses, part-time or full-time student status, or add-on programs such as minors or double-majors.

Students deviating from this plan must fulfill course prerequisites and must meet with the faculty advisor in their department to confirm degree requirements. Students intending to transfer to CU Denver to pursue a Bioengineering B.S. degree should note the following:

1. The College of Engineering, Design and Computing has a competitive admissions process. Student may be admitted to CU Denver but not the College of Engineering, Design and Computing. Such students may work with CU Denver’s Academic Success and Advising Center to identify an alternative major and/or program of study.
2. Colorado Community College students should transfer to CU Denver once they have met the College of Engineering, Design and Computing’s admission requirements. They should not necessarily complete an associate’s degree.

## Year Three

### Fall (Downtown)

- BIOE 1010 - Bioengineering Design and Prototyping I  
  - 3 credits
- BIOE 2010 - Intro to Programming for Bioengineers  
  - 2 credits
- CHEM 3411/3418 – Organic Chemistry/Lab I  
  - 5 credits
- International Perspectives  
  - 3 credits

**TOTAL 13 credits**

### Spring (Downtown)

- BIOE1020 - Bioengineering Design and Prototyping II  
  - 3 credits
- BIOE2020 - Intro to Comp Methods for Bioengineers  
  - 2 credits
- PSYC 1000 - Introduction to Psychology I (recommended)  
  - 3 credits
- SOCY 1001 – Introduction to Sociology (recommended)  
  - 3 credits
- Cultural Diversity  
  - 3 credits

**TOTAL 14 credits**

## Year Four

### Fall (Anschutz Medical Campus)

- BIOE3010 - Bioinstrumentation  
  - 3 credits
- BIOE3020 - Introduction to Biomechanical Analysis  
  - 3 credits
- BIOE3030 - Introduction to Biomaterials  
  - 3 credits
- BIOE3040 - Physiology for Bioengineering  
  - 3 credits

**TOTAL 12 credits**

### Spring (Anschutz Medical Campus)

- BIOE3050 - Cell & Molecular Bioengineering  
  - 3 credits
- BIOE3051 - Cell & Molecular Bioengineering  
  - 3 credits
- BIOE3060 - Biostatistics, Measurement, and Analysis  
  - 3 credits
- BIOE3090 - Introduction to BioDesign  
  - 3 credits

**TOTAL 12 credits**

## Year Five

### Fall (Anschutz Medical Campus)

- BIOE4035 - Undergraduate BioDesign II  
  - 3 credits
- BIOE Technical Elective  
  - 3 credits
- BIOE Technical Elective  
  - 3 credits
- BIOE3070 - Bioengineering Lab I  
  - 3 credits

**TOTAL 12 credits**

### Spring (Anschutz Medical Campus)

- BIOE4045 - BioDesign III  
  - 3 credits
- BIOE Technical Elective  
  - 3 credits
- BIOE Technical Elective  
  - 3 credits
- BIOE3071 - Bioengineering Lab II  
  - 3 credits

**TOTAL 12 credits**

**Total Hours at CU Denver: 75**
