*Pediatric Grand Rounds*

*"Translating Data into Practice to Achieve Perinatal Health Equity"*

*(Zoom Link: <https://zoom.us/j/293160798>)*

Dr. Lula Lubchenco was faculty in the Department of Pediatrics at the University of Colorado from 1943 through 1977. Although best known for her landmark description of the risk profile of variations in intrauterine growth by gestational age, Dr. Lu made contributions to regionalization of perinatal care, family-integrated care, inter-professional collaboration, and assessment of outcomes across the continuum from prenatal life to adulthood. Her research arose from the challenges she met as a clinician, and her scholarship continues to influence neonatal care around the world.
